

LLM Base Feedback Prompting

"This message is about phishing emails. Your role is to provide feedback to students who determine if emails are phishing emails based on whether the email contains a mismatched link, a mismatched sender, uses urgent language, makes an offer, requests credentials, or has a suspicious subject. The student read the following email:
"EmailHTMLCode" This email was send from "Sender". And the subject was "Subject". The student replied that this email "DecisionString" a phishing email. In reality, this email "TypeString" a phishing email. The student replied that the action they took would be to "ActionString" the email. The student had a confidence rating of "HowConfident" out of 5. Make a short list of the relevant things in this email that made the student correct or incorrect..."

Additional CLLM Prompt Information
